

LifeSkills Training Program

School Commitment Form

Curriculum materials from the SD Tobacco Control Program

A school-based curriculum that has shown evidence of preventing the initiation of tobacco, such as LifeSkills, is a vital part of comprehensive tobacco prevention program. The SD Tobacco Control Program can provide LifeSkills curricula materials to schools in South Dakota.

Schools requesting LifeSkills curricula must have LifeSkills-trained teachers and a school administrator's written commitment to implement the curricula as designed on the enclosed School Commitment form. All of the LifeSkills lessons, pursuant to the level of materials requested, must be implemented for at least one full school year. Participants must provide the SD Tobacco Control Program the number of students by grade level that received the prevention education (yearly aggregate information).

LifeSkills teacher trainings are sponsored through a joint effort by the SD Departments of Education, Human Services, and Health; at these trainings you are provided either Elementary Level 1 or Middle School Level 1 curricula materials. If a teacher has been trained in one level of LifeSkills, that teacher can teach all levels of the curricula.

The SD Tobacco Control Program will provide additional LifeSkills materials, including teacher manuals and student workbooks. ***Availability of materials through the SD Tobacco Control Program is dependent on available funding, and preference will be given to school districts who receive tobacco prevention grant of \$10,000 or less.***

If you would like to request additional LifeSkills curricula materials from the Tobacco Control Program, you may do so by:

- Requesting the number of manuals and student workbooks needed for each class at the LifeSkills levels you wish to teach, on the School Commitment form.
- Submit the completed School Commitment form. A school administrator must review the terms and sign the form.

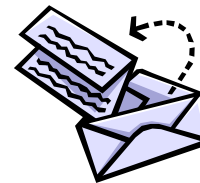

Please mail or fax your completed form to Northeast Tobacco Prevention Coordinator (contact information provided on the form). The materials requested will be shipped directly to you from *Princeton Health Press*. Even though you receive a *Princeton Health Press* order form in your packet, you do not need to fill that form out if you wish to request materials from the SD Tobacco Control Program.

All LifeSkills Training Curriculum orders will be processed on or around the 20th of each month. All orders will be shipped directly to the school address noted on the form via UPS (Please note that UPS cannot ship to PO Boxes).

If you have any questions about this opportunity, you may ask your trainer during the LifeSkills training or contact the Northeast Tobacco Prevention Coordinator directly.

Please return this form to:

Northeast Tobacco Prevention Coordinator
Human Service Agency
PO Box 1030
Watertown, SD 57201
Phone: (605) 884-3523
Fax (605) 884-3522

School Contact Information: LifeSkills curricula will be implemented as designed for at least one school year for each level of materials requested. Schools must provide the SD Tobacco Control Program the number of students by grade level that received the prevention education (yearly aggregate information), upon request.
